

# CogAT<sup>®</sup>

## Support gifted and talented students with CogAT

The *Cognitive Abilities Test Form 7*, the most widely used and trusted abilities test on the market today, assesses students' verbal, quantitative and nonverbal reasoning abilities and provides reliable data for enrichment program decisions. This highly respected resource offers a true measure of student abilities and provides school administrators with greater and more flexible tools to inform decision making.

By administering *CogAT*<sup>®</sup>, teachers have early information about a student's school abilities and can help the student become a better learner.

Published by Houghton Mifflin Harcourt – Riverside and authored by Dr David F. Lohman, an internationally recognised expert on ability assessment, *CogAT* continues to:

- ▶ Help identify all students' abilities
- ▶ Link teachers to instructional strategies through unique Ability Profiles
- ▶ Deliver predictive data with the *Iowa Assessments* and highlight significant discrepancies between expected and actual achievement
- ▶ Include three separate cognitive domains to form a more comprehensive perspective of a student's reasoning abilities
- ▶ Offer superior technical quality.

Dr Lohman has built many enhancements into Form 7. *CogAT* is even more appropriate for use with ESL students; for example, much of the language has been replaced by pictures or figures. Eight of nine subtests at the primary level are entirely language-free. A new page design and new item types also add to the value and efficacy of the group-administered abilities test that more educators choose than any other.

## Features and Benefits:

- ▶ **ESL Friendly:** Form 7 further levels the playing field for English language learners by introducing improvements such as replacing verbal prompts with picture prompts.
- ▶ **Measures Broad Range of Student Performance:** The addition of more challenging items at each level will help reduce the need for out-of-level testing.
- ▶ **Screening Form:** The new screening form provides districts the ability to offer a quick, additional data point when determining eligibility for accelerated programs.
- ▶ **Professional Development and Support:** Teachers and administrators are able to review interactive web content, view videos, review pre-testing instructions, and learn instructional strategies based on student performance, helping answer the "what's next" questions.
- ▶ **Flexibility in Administration:** Provides educators with flexible methods of administration and scoring.
- ▶ **New Attractive Design:** Features an all new design to help keep students engaged.
- ▶ **New Reporting Options:** Talent Identification Reporting blends scores from achievement, ability and giftedness scales, providing the ability to review multiple data points.
