

We are excited to announce the Eddies Education Partnership Program, where we the College collaborates with community organisations to enhance and broaden the education of our students. The Partnership Program works to improve student engagement, improve academic outcomes for students, enhance the social wellbeing of students and broaden vocational options and skills.

We thank the following organisations for being in partnership and collaboration with us, offering our students a wide range of opportunities and skills.

The College is partnering with the University of Canberra through the new St Edmund's College Sports Academy. This provides an opportunity for our students to consider a sports-focused pathway that offers direct, non-ATAR entry to a number of undergraduate courses at the University of Canberra. This means that a tertiary pathway is now open to students who may not have necessarily considered a tertiary education, or who were wanting a more tailored, individual approach to the tertiary pathway.

St Edmund's College is partnering with the Canberra Raiders through our Sports Science program. The Raiders partnership will provide a clear connection between St Edmund's College and the Canberra Raiders for students playing Rugby League, maintaining and engaging these students at a high level both academically and physically.

Regular on-field training will be developed by College staff and the Canberra Raiders. The partnership will allow contracted Canberra Raiders juniors to have a pathway to an independent Catholic education with a dedicated pastoral care system. Students will participate in Rugby League Gala Days and have a clear representative program for Rugby League students enrolled at St Edmund's College.

The College is in partnership with the Hyatt Hotel in Canberra. This partnership will allow our Hospitality students to immerse themselves in all aspects of the Hospitality industry, engage in real work opportunities and work alongside experts in the Hospitality field to develop their skills and competencies, be mentored and coached and build their professional network. This is a wonderful initiative for our students, providing a unique opportunity for them to broaden their skills and options.

St Edmund's College is proud to formalise a partnership with Accelerate Physiotherapy. Accelerate Physiotherapy will work extensively with our Co-Curricular and senior Talented Sports Programs to provide elite level athlete screening, assist in the injury and rehabilitation of student athletes and to help develop athlete knowledge of content studied in senior courses. St Edmund's College is excited to strengthen this partnership and work towards student athlete development.
